Professional Summary

Software Engineer with experience building **AI-powered applications, conversational platforms, and data analytics dashboards** for enterprise and government clients, including **NPCI, Bosch, SEBI, and Tata**. Skilled in **React, Angular, React Native, Next.js, and Python**. Experienced in developing **cross-platform mobile applications, conversational AI systems, chatbot integrations, and analytics dashboards** used by large-scale users.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, C, C++
- **Frontend:** React.js, Angular (8–19), Next.js, HTML, CSS
- **Mobile Development:** React Native, Android Studio, Xcode, Gradle, CocoaPods
- **Backend & Tools:** Flask, SQLite, Firebase, REST APIs, Socket.io
- **AI / GenAI:** Retrieval Augmented Generation (RAG), LLM Integration, Vector Embeddings, Semantic Search, AI Chatbot Development
- **AI Platforms:** Groq Cloud (LLM inference), Embedding generation, Website data extraction, document ingestion pipelines
- **Libraries:** Chart.js, Zustand, React Flow
- **Cloud Platforms:** AWS, GCP, Firebase
- **Domains:** Conversational AI, Chatbot Development, Data Visualization, Real-time Systems

Experience

CoRover Private Limited

Nov 2023 – Present

Software Engineer

Bengaluru, India

DigiSaathi – NPCI Chatbot Platform

- Migrated DigiSaathi chatbot platform and website from **Angular 8 to Angular 19**, improving maintainability and performance.
- Built **analytics dashboards** monitoring chatbot interactions, including conversation type (voice/text), device data, user intents, and feedback metrics.
- Optimised UI architecture to support high traffic for a platform serving **200K+ users**.

Bosch Financial Conversational Analytics Platform

- Developed a **conversational analytics dashboard** enabling users to query financial data using voice and text.
- Implemented dynamic chart rendering using **Chart.js** supporting multiple charts (bar, line, radar) within a single response.
- Built automated **monthly financial summary generation** based on the previous month's data.

KanhaJi AI – Smart AI Companion for Children

- Developed a **cross-platform React Native mobile application** (Android and iOS) for onboarding and managing the KanhaJi Home Pod.
- Implemented **QR-based device registration** for toy activation and onboarding.
- Built personalisation features allowing parents to configure child name, nickname, age, gender, and language preferences.
- Implemented **AI-powered reminders and alarm systems** where the device interacts with children to remind them of tasks.
- Developed **AI safety alerts** sending push notifications to parents if sensitive conversations are detected.
- Built a **conversation history dashboard** enabling parents to review interactions between the AI device and the child.

Live Chat Bot Integration

- Implemented chatbot to human-agent handoff using **Socket-based integration with Freshworks**.
- Passed full chat context and conversation history to the live agent to improve resolution accuracy.
- Ensured seamless user experience without disrupting ongoing conversations.

Tata IVR Management Platform

- Built a **full-stack IVR management portal** for managing call operations.
- Implemented **CSV-based bulk call initiation** for inbound and outbound calls.
- Developed dashboards displaying call logs, analytics, and operational metrics.

Personal Projects

Knodal AI – AI Analytics Platform and GenAI Chatbot

- Built an **AI-powered analytics platform and GenAI chatbot** inspired by Knodal.ai for analysing business datasets and generating insights.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline** enabling users to query connected data sources such as CSV files, PostgreSQL databases, and extracted website content.
- Used **Groq Cloud for LLM inference** and embedding generation to enable high-speed AI responses.
- Developed document and website ingestion pipelines to **extract, process, and embed structured and un-structured data** for semantic search.
- Built a **drag-and-drop node-based dashboard builder** using React Flow, supporting custom analytics workflows.
- Implemented support for **600+ chart visualizations** for advanced data analytics dashboards.

Education

Model Institute of Engineering and Technology

B.Tech in Computer Science Engineering

2020 – 2024

CGPA: 8.0

Achievements

Winner – Smart India Hackathon 2022

Department of School Education & Literacy (DoSEL), Ministry of Education

- Built an **AI-powered emotion monitoring system** using voice tone analysis and machine learning.
- Won **1st place among 50+ teams nationwide**.
